

DATA FOR **PROGRESS**

From October 18 to 19, 2023, Data for Progress conducted an omnibus survey of 1,329 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,329 unless otherwise specified.

[16] When thinking about the fact that there is currently no Speaker of the House of Representatives, which of the following statements comes closer to your view, even if neither is exactly right?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Republicans are to blame. They are the party with majority power and they haven't been able to govern effectively. Republicans should be able to agree on a Speaker of the House within their own party.	57	79	54	35	54	61	48	63	54	64	61	58	52
Democrats are to blame. They should not have voted with eight Republicans to remove Kevin McCarthy as Speaker of the House. Democrats should have put aside their differences to save McCarthy for the sake of stability.	28	12	23	50	28	28	31	27	31	24	20	30	27
